

Calendar Booking

ABOUT:

To date, GoFetch has been about on-demand delivery. When a Customer logs a job, it is for pick-up and drop off ASAP. Sometimes, however, you may need to log a delivery request for later in the day or even next week. This option is now live!

When you book a job, a new field has been added with a drop-down calendar feature. Simply input your preferred date and time. When you hit 'Request Fetch' and the job is taken, your Fetcher will sit on that job until the delivery day. Our Support team reminds the Fetcher and monitors the job to ensure everything runs seamlessly.

How it works:

All done, Deliver Your Life Back
